Data source and methods

Incidence

Country-specific data source: Cancer Registry of the Metropolitan Area of Bucaramanga, Cali Cancer Registry, Cancer Registry of Manizales, Cancer Registry of Pasto
Method: Estimated from national mortality estimates by modelling, using mortality:incidence ratios derived from country-specific cancer registry data

Mortality

Country-specific data source: National (WHO)
Method: National rates projected to 2018

Prevalence

Computed using sex-, site- and age-specific incidence to 1-,3- and 5-year prevalence ratios from Nordic countries for the period (2000-2009), and scaled using Human Development Index (HDI) ratios.
