Data source and methods

Incidence
Country-specific data source: No data
Method: No data: the rates are those of neighbouring countries or registries in the same area

Mortality
Country-specific data source: No data
Method: Estimated from national incidence estimates by modelling, using incidence:mortality ratios derived from cancer registry data in neighbouring countries

Prevalence
Computed using sex-, site- and age-specific incidence to 1-,3- and 5-year prevalence ratios from Nordic countries for the period (2006-2015), and scaled using Human Development Index (HDI) ratios.
