Data source and methods

**Incidence**
Country-specific data source: Bahía Blanca Cancer Registry, Chaco Cancer Registry, Córdoba Cancer Registry, Entre Ríos Cancer Registry, Provincial Registry of Tumors of Mendoza, Neuquén Cancer Registry, Santa Fe Cancer Registry, Cancer Registry of the Province of Tierra del Fuego
Method: Estimated from national mortality estimates by modelling, using mortality:incidence ratios derived from country-specific cancer registry data

**Mortality**
Country-specific data source: National (WHO)
Method: National rates projected to 2020

**Prevalence**
Computed using sex-, site- and age-specific incidence to 1-3- and 5-year prevalence ratios from Nordic countries for the period (2006-2015), and scaled using Human Development Index (HDI) ratios.
