Data source and methods

Incidence

Method: Weighted/simple average of the most recent local rates applied to 2020 population

Mortality

Country-specific data source: Regional

Method: Estimated from national incidence estimates by modelling, using incidence/mortality ratios derived from cancer registry data in neighbouring countries

Prevalence

Computed using sex-, site- and age-specific incidence to 1-3- and 5-year prevalence ratios from Nordic countries for the period (2006-2015), and scaled using Human Development Index (HDI) ratios.
