**Data source and methods**

- **Incidence**: Country-specific data source: National
  Method: “All sites” estimates from neighbouring countries partitioned using frequency data

- **Mortality**: Country-specific data source: No data
  Method: Estimated from national incidence estimates by modeling, using incidence:mortality ratios derived from cancer registry data in neighbouring countries

- **Prevalence**: Computed using sex-, site- and age-specific incidence to 1-,3- and 5-year prevalence ratios from Nordic countries for the period (2006-2015), and scaled using Human Development Index (HDI) ratios.
