Data source and methods

Incidence

Country-specific data source: Registre des cancers du Mali
Method: Most recent rates from a single registry applied to 2020 population

Mortality

Country-specific data source: No data
Method: Estimated from national incidence estimates by modelling, using incidence:mortality ratios derived from cancer registry data in neighbouring countries

Prevalence

Computed using sex-, site- and age-specific incidence to 1-;3- and 5-year prevalence ratios from Nordic countries for the period (2006-2015), and scaled using Human Development Index (HDI) ratios.
