Data source and methods

Incidence

Country-specific data source: Oman National Cancer Registry

Method: National (or local with coverage greater than 50%) rates projected to 2020

Mortality

Country-specific data source: National (WHO)

Method: Estimated from national incidence estimates by modelling, using incidence:mortality ratios derived from cancer registry data in neighbouring countries

Prevalence

Computed using sex-, site- and age-specific incidence to 1-,3- and 5-year prevalence ratios from Nordic countries for the period (2006-2015), and scaled using Human Development Index (HDI) ratios.
