Data source and methods

Incidence

Country-specific data source: Local

Method: "All sites" estimates from neighbouring countries partitioned using frequency data

Mortality

Country-specific data source: No data

Method: Estimated from national incidence estimates by modelling, using incidence:mortality ratios derived from cancer registry data in neighbouring countries

Prevalence

Computed using sex-, site- and age-specific incidence to 1-;3- and 5-year prevalence ratios from Nordic countries for the period (2000-2009), and scaled using Human Development Index (HDI) ratios.
