<td>12,406</td>
</tr>
</tbody>
</table>

### Data source and methods

**Incidence**

Country-specific data source: National
Method: National (or local with coverage greater than 50%) rates projected to 2020

**Mortality**

Country-specific data source: National (WHO)
Method: Estimated from national incidence estimates by modeling, using incidence:mortality ratios derived from cancer registry data in neighbouring countries

**Prevalence**

Computed using sex-, site- and age-specific incidence to 1-, 3- and 5-year prevalence ratios from Nordic countries for the period (2006-2015), and scaled using Human Development Index (HDI) ratios.
