Number of deaths

**9 209**

Number of prevalent cases (5-year)

**34 291**

## Data source and methods

### Incidence

**Country-specific data source:** Republika of Srpska Cancer Registry

**Method:** Estimated from national mortality estimates by modelling, using mortality:incidence ratios derived from country-specific cancer registry data

### Mortality

**Country-specific data source:** National (WHO)

**Method:** Most recent rates from one source applied to 2020 population

### Prevalence

Computed using sex-, site- and age-specific incidence to 1-,3- and 5-year prevalence ratios from Nordic countries for the period (2006-2015), and scaled using Human Development Index (HDI) ratios.
